The Power of Data for Social Outcomes

November 15, 2018

Our evolving analytic platform

Do Student Loans Work?

In an outcomes, evidence based world in which we now live, why do we fund enrolment and not graduation?

Does a \$1 loan translate into a high performing student? A drop-out? No effect?

What would a \$2 loan generate? \$0.50?

Top Injury Claim Volume

By injury event type (wind gust alert days)

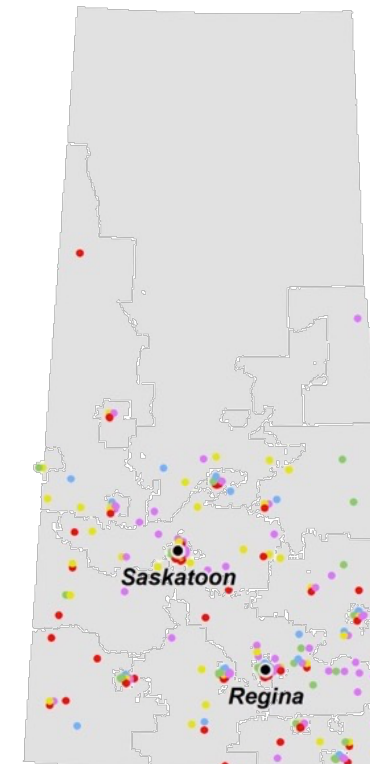

On Wind Gust Alert days, falls become the most common injury event type

Injury Type as a Percentage of Total Injuries

	No wind gust alert	Wind gust alert
Fall to floor, walkway	8.07%	12.24%
Overexertion in lifting	12.83%	12.17%
Bending, climbing	10.56%	10.59%
Struck by falling object	5.37%	5.47%
Bodily reactions	3.97%	3.9%

The presence of a wind gust alert increases the proportion of Fall-related injuries by over 50%

- (179) Fall to floor, walkway, or other surface
- (178) Overexertion in lifting
- (155) Bending, climbing, crawling, reaching, twisting
- (80) Struck by Falling object
- (57) Bodily reactions & exertion, n.e.c.
- Postal Code Regions

Suncor – Autonomous Vehicles

- Run 24/7, 365 days/year
- 25% reduction in maintenance costs
- 20% improvement in fuel efficiency
- \$750K annual salary reduction
- 95% improvement in safety

Imagine a world....

- No accidents.....
- No Autobody Shops...
- No Automobile Insurance....

Trying to Solve New Problems Old Ways...

If we indeed believe that autonomous vehicles (cars) are a part of our future, then is it a conscientious decision not to include them in our current policy deliberations?

The LAST people we should consult about autonomous vehicles should be the Taxi Drivers...

Evolving Data Services

STRUCTURED & UNSTRUCTURED DATA

- Highly organized information that uploads neatly into a relational database (think traditional row database structures)
- Lives in fixed fields, and is easily detectable via search operations or algorithms
- Structured data is relatively simple to enter, store, query, and analyze

Structured Enterprise Data

10%

Unstructured Enterprise Data

90%

- May have its own internal structure, but does not conform neatly into a spreadsheet or database
- Increasingly available in the form of complex data sources, such as web logs, multimedia content, email, customer service interactions, sales automation, images, video, audio and social media data

“It’s not about your Data, it’s about THE data...”

- Data knows no organizational boundaries
- Data knows (nor cares) about social norms!
- You possess a micro-fraction of the data available to you and a micro-fraction of the data that is *useful* to you
- Privacy and security must be respected and understood...your anonymous data and my anonymous data is not necessarily anonymous

Saskatchewan Human Services spending

- \$14.46B in Provincial Budget
- Approximately 82% devoted to Human Services
- \$11.86B devoted to Human Services
- 6% of the population uses 2/3 of the spend

Yet, nationally we perform worst or near the worst...

Spending per Capita, 2016 - 17

Scope of Services

- Data Storage

OPERATIONAL REPORTING

- Standard Reporting
- Enterprise Reporting
- Cross Organization Reporting

ADVANCED ANALYTICS

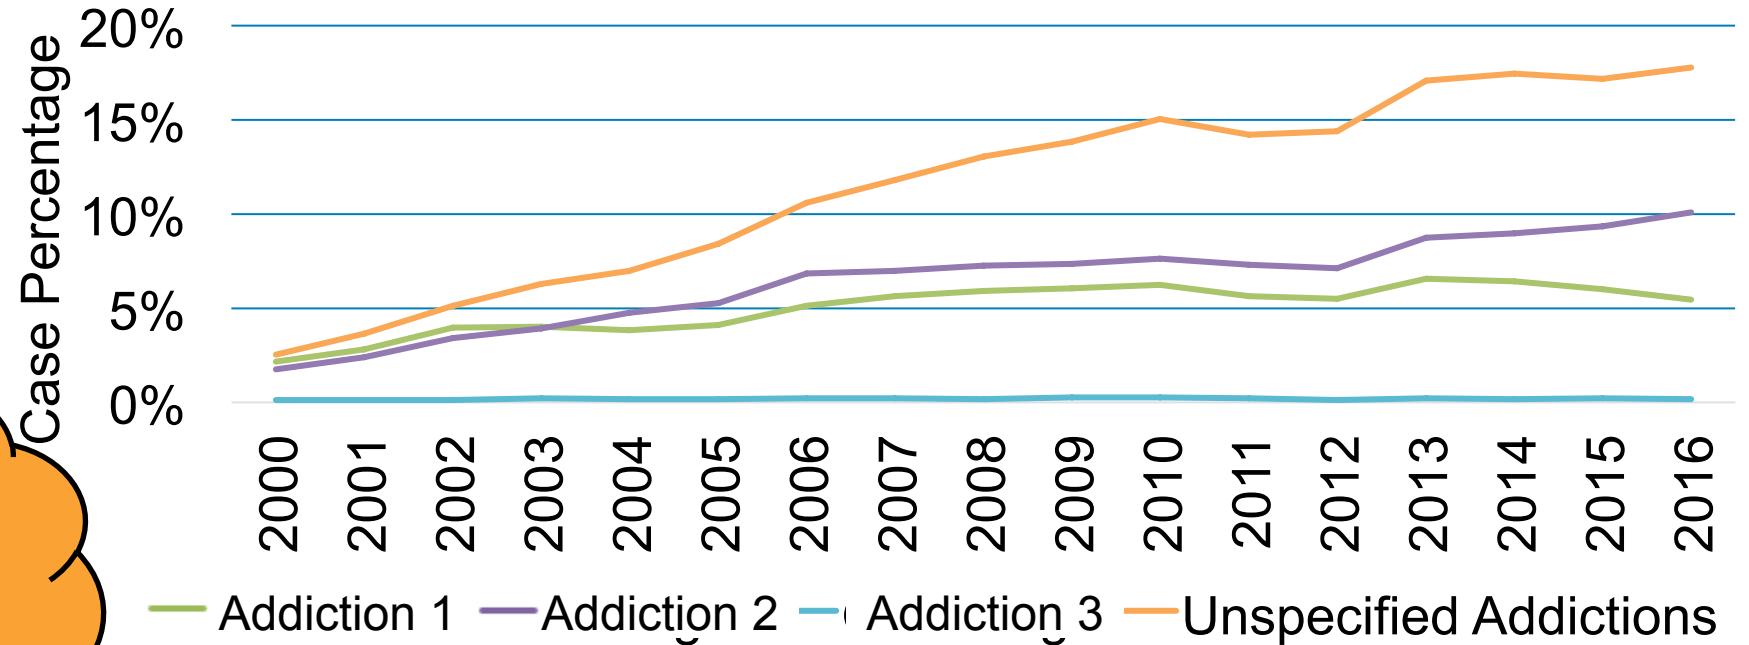

- Advanced Analytics Projects
- Operational Analytics

Multi-System and
Multi-Organization
data matching is
possible **without** a
Universal Identifier.

Text Mining Over Years: Addictions

Program A

Graphs indicate the percentage of cases where addictions were *mentioned* - more than 200 categories were mined from the text

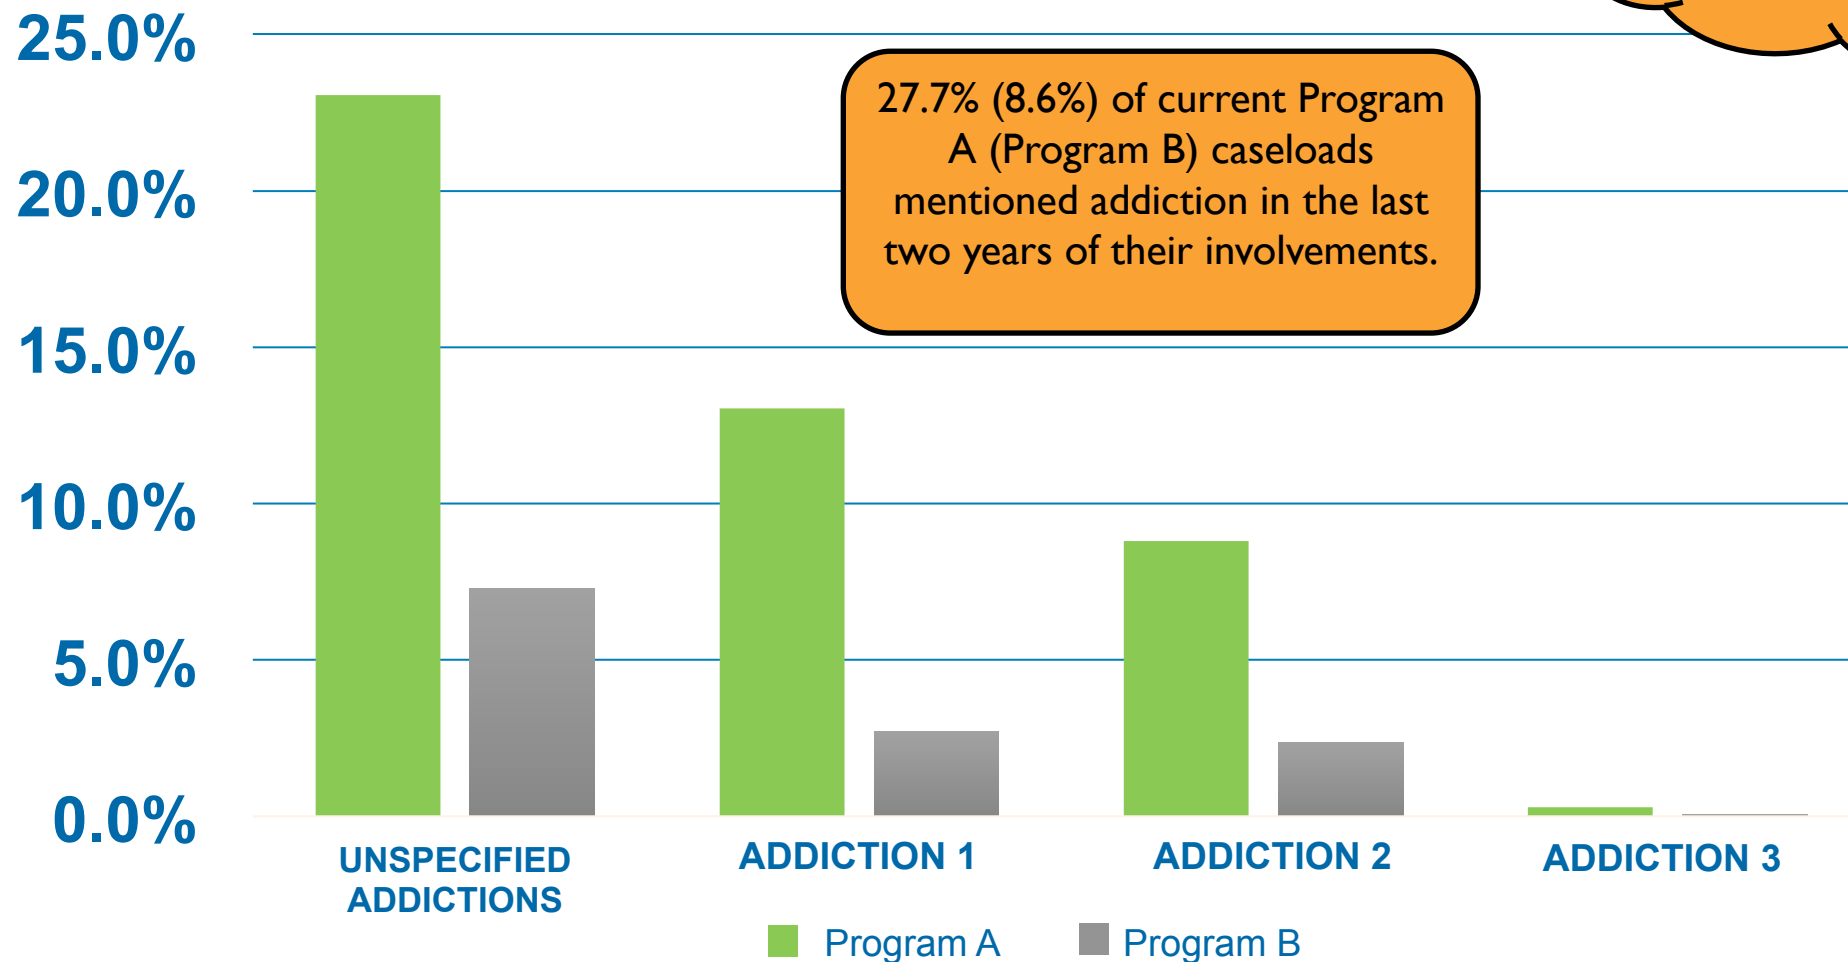

Program B

Which topics were mentioned in a client's case notes? (in the last two years of their involvement)

Current Caseload Assessment of open text mentions.

Addiction

Sample Cohort Analysis (fictitious numbers)

Example:

Females with dynamic/high number of beneficiaries as well as SRHS involvement

Size (%)	11.6%
Money spent on the cohort (\$M) in last 1 year / (%)	\$36.4^M / 21.4%
Average money per involvement in last 1 year (\$K)	\$13.9^K
Average number of months involved in last 1 year (month)	11.5
Average \$ per involvement per month (\$) in last 1 year	\$1,207
Average \$ per involvement per beneficiary per month (\$) in last 1 year	\$546

By leveraging insights from open text and structured data across all Human Services ministries, client cohorts were created to provide targeted interventions and programming.
